and Environmental Control
Div. of Air and Waste Management
715 Grantham Lane
New Castle, DE 19720-4801

Dear Ms. Hiller:

Enclosed please find a draft Feasibility Study Report of Remedial Alternatives for the Delaware City site prepared by Weston and hereby submitted on behalf of Standard Chlorine of Delaware, Inc. (SCD). The alternatives have been reviewed and evaluated by Weston in accordance with the National Contingency Plan (NCP). Weston has recommended that Alternative #3, Closure, be implemented as an effective and affordable means of remediating the site. SCD concurs with Weston's recommendation and believes that with careful planning and phasing of the remedial technologies, it will be able to implement a remedial plan for the site. We urge your favorable consideration of the Feasibility Study Report.

Please feel free to contact me if there are any questions.

Sincerely,

Robert J. Touhey, P.E.
Vice President
Environmental Affairs
